MYTH BUSTING

I NEED TO LEARN ALL OF MY KNOWLEDGE ORGANISER IN ONE NIGHT... HELP!!

- No one expects you to fully learn a whole page or even a section of your K0 in one K0 homework.
- The aim is to learn your K0s over the 10 week teaching cycle.
- Teachers will use and refer to your K0s in lessons so you can see you are learning the knowledge in lessons as well.
- The low stakes quick quizzes and mini tests in lessons will also help you learn the knowledge.

I AM BEING TOLD I HAVE A KNOWLEDGE TEST TOMORROW - DO I NEED TO REVISE FOR IT?

- **No** – knowledge quizzes are “low stakes”.
 - This means you don’t need to specifically revise for them – you are revising/learning as you go through you KO homework and through lessons.
 - They are a check to see what you do and don’t know.
 - As with the previous slide – no one could expect you to learn everything in one go.

I DON'T KNOW WHAT TO DO MY K0 HOMEWORK ON - HELP!

- Your teachers will tell you what sections to work from when doing your K0 homework.
- If they haven't perhaps focus on the section which matches the most recent lesson.
- The next cycle of K0 will have clear section labels to help with this.

CLASS CHARTS DEADLINES FOR K0 HOMEWORK DON'T MATCH THE SCHEDULE IN MY KNOWLEDGE BOOK...

- The deadlines are only there to give you an idea as to how long you should be learning those specific sections for.
- **Always do your K0 homework in-line with the schedule in your Knowledge Book.**

20 MINUTES PER NIGHT ISN'T ENOUGH FOR ME TO LEARN IT PROPERLY!

- Remember, the KO homework is only one part of the learning process.
- Don't forget: **Look, Cover, Write, Check.**
 - You are better to try to learn less things properly than lots poorly - keep repeating the same things if it isn't going in.
 - Do not just copy out a whole section, take your time and do it properly - **don't cheat yourself!**
- **Stop at 20 minutes per subject - this is for your own benefit so you have time to be doing other things.**

REPETITION

- As part of your learning go back and try to recall / retrieve information you have previously learnt. **For example** in week 4 try to recall key knowledge from week 1. How much can you remember? Use green pen to mark and purple to correct.
- It is normal not to remember everything first time.
- The more you check back on your work the more you will remember and learn!
